We reject Speaker Corey Johnson's "Planning Together" report and oppose his companion bill Intro. 2186-2020. This anti-democratic, anti-community proposal will have a devastating economic impact on the future of this city and our neighborhood. The Speaker Johnson says that the solution to affordable housing is to eliminate one family housing. He claims poorer neighborhoods do not have the resources compared to more affluent communities. The solution Mr. Speaker is to adequately fund community boards to do urban planning. This is nothing short of a raid on single family homeowners for land greedy developers. Preservation of our housing stock keeps housing affordable not the building high rises which are not affordable. You need to continue to use existing land use processes with Community Board to develop affordable residences.
